full sun/light shade

1m high

1m wide

water wise

winter/spring

COMMON NAME: Qualup Bell

BOTANICAL NAME: *Pimelea physodes* ‘Qualup Bell’ GRAFTED

ORIGIN: A grafted species of the naturally occurring *Pimelea physodes* from the South West of Western Australia, grafted for its performance and vigour.

HABIT: A small shrub with a compact growing habit. Grows to 1m high and 1m wide.

FEATURES: *Pimelea physodes* ‘Qualup Bell’ produces large, pendant flowers in the shades of yellow, green, red and purple during winter to late spring.

USES: The ornamental nature of this species makes it a brilliant central focus point in formal gardens, particularly when used in group plantings. It is great at attracting pollinators, butterflies and nectar eating birds and is perfect as a potted feature plant in large, decorative pots.

POSITION/SOIL: *Pimelea physodes* ‘Qualup Bell’ is suited to a wide range of soil conditions provided good drainage. Thrives in a full sun to part shade position with shelter from strong winds.

CULTIVATION: These plants are grown via cutting propagation from select parent stock and are grafted onto strong root stock to ensure plant health and vigour.

MANAGEMENT: *Pimelea physodes* ‘Qualup Bell’ requires little maintenance and is drought tolerant once established. Pruning is suggested after flowering to encourage a denser habit and new growth and will benefit from fertilising once a year in spring.

Use unique W.A. flora on your next project.
